# COUNTY BENCHMARK KEY: A Comprehensive Guide to Understanding Data

Base data for each indicator presents a rate for a previous three-year period when data comparable to that measured currently was available. Each item specifies the base rate and period in which it was collected.

The bar chart shows the percent change between the base data and the recent data for each indicator. If the bar goes to the left of center, the county rate has worsened. If the bar goes to the right of center, the county rate has improved. The wider bar behind the bar chart is the state rate for that indicator and allows you to compare the county with the state as a whole.

Recent Data for each indicator presents a rate for the most recent three years. Each item specifies the recent rate and period in which it was collected.

Oklahoma's methodology for counting high school dropouts has changed preventing comparisons over time. Trend data will be available on future Factbooks.

The county is ranked on each indicator to allow you to compare rates for the county with other counties. 1 is the best ranking; 77 is the worst ranking.
